

Standard Website Creation Process

STEP 1 Design Consultation

Our design consultant will contact you to discuss your website requirements. If possible we will arrange a face-to-face meeting with you.

STEP 2 Provide the content you want on your website

You would need to provide us with your content and images. The best way of achieving this would be agreed at the consultation stage. The content can be contained in a word document and attached to an email, or just typed straight into the email. Images can be emailed to us too. Larger images can be sent via programmes such as Dropbox. If you have an existing site we can re-use its content.

STEP 3 Homepage design

We will set out our vision of your homepage for your consideration and review. Once we have agreed your homepage style and design we will invoice you for 50% of the agreed total price. Once payment is received we will create your menu pages and any other content.

STEP 4 Website creation

We complete your website based on the information and content that you have provided us.

STEP 5 Review your website

Netinspire will give you access to your website for you to consider any amendments that you may require. Remember, you can always change the site content after the site goes live. Speak to our design consultant and we will carry out any specific amendments you require to your website. We carry out one review only before invoicing for the balance of the agreed price.

STEP 6 We publish your completed website

We will advise you of the launch of your site as soon as final payment is received. We will give you access to your site where a content managed site has been provided. Then you can alter or update it yourself at no cost. If you haven't requested a CMS we can quote for updates. We offer a 30-day policy where we will fix any problems, which may occur with the design of the site free of charge.

STEP 7 Service partnership proposal

During the construction of your website we will gain an understanding of your future on going needs for online business management. Based on this we will provide for your consideration a service proposal covering consultancy, updates, SEO, site security & backup, online marketing and reporting.
